Dear Customer

The next 12 months will see plenty of interesting cars and track from all the major slot car manufacturers. Digital Systems are on the way from Scalextric, SCX and Carrera. These digital systems allow more than one car to race in a lane and offer passing tracks to change lanes.

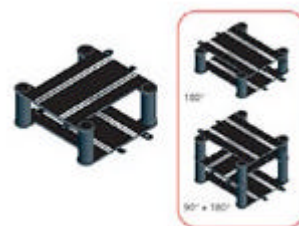

Should you wish to place an order for any of the items listed please contact the shop.

Scalextric Sports Digital Track and Sets

The Scalextric Sport Digital system brings a whole new dimension to Scalextric racing by allowing up to 6 cars to race on the same lane. Special track pieces allow drivers to switch lanes and overtake in corners at the press of a button on the new Sport Digital hand throttles. System uses Optical Sensor technology. Sport Digital also offers users 9 different race modes, hand throttles with adjustable settings and will be available in a ready to race set.

The Hand control has three controls: One for throttle, one for changing lanes the other for brake.

Sport Digital is compatible with existing Scalextric Sport and Classic track as well as the non-digital SCX track, special micro chip-fitted cars will be available along with chips for retro-fitting recent Scalextric cars.

Availability is expected in November—December 2004. More information will be posted out as pricing and track and car details become available.

See <http://www.scalextricsportdigital.com/> for further details

SCX Digital System

The SCX Digital system enables up to 6 cars of racing on any of the two lanes. The system is not compatible with any other track. There are only 4 different pieces of track available—see below for track details. The system uses a button on the hand control to move the guide blade down further into the slot which mechanically moves the changeover track. Only SCX Digital cars can be used on this track. See <http://www.scxdigitalsystem.com/> for further details
